

EDD PLTW (YR. 4) PROJECT PRESENTATIONS

UMHS PLTW Engineering Pathway:

The fourth and final year of the PLTW pathway is an exciting one! In this year the students get the experience of taking an idea and making it reality. They learn the steps of design and development that a company might go through in order to make a product come to market. This includes: polling of the public, searching for patents of similar products, designing a prototype, testing the prototype, making evaluations and a future plan. Our students have been working hard for the past five months and would like to invite those interested to view, explore and give input on what they have accomplished.
